Beekeeper Notification

The list of Officially Registered Bee Yards is compiled every year. A beekeeper will be sent a list of the bee yards he had registered for the previous year so that a decision can be made on whether or not to register them again for the current year. If a beekeeper wishes to register any new bee yards, the Bee Yard Registration Form for Pesticide Notification for New or Additional Registration is completed.

All renewal registrations and new registrations must be received by the Pesticide Control Program by March 1st to be included on the official notification list for that year.

Follow the instructions on the registration forms for renewal or new registrations. Be sure to provide all the required information so as to avoid missing the March 1st deadline.

If there are any questions regarding the procedure for registering your bee yards, please call the Pesticide Control Program at 609 948-6992.
